COVID 19 AWARNESS AND RESPONSIBILITIES

1. TRAINING – Corona virus (COVID-19)

- COVID-19 is spread from someone infected with COVID-19 virus to people they have been in 'close contact' with or by contact with contaminated hands, surfaces or objects contaminated by droplets spread by coughing or sneezing.

'Close contact' refers to

- Having face-to-face contact with an infected person for at least 15 minutes
- or been in the same closed space for at least 2 hours, as someone who has tested positive for the COVID-19 when that was infectious.
- Generally, symptoms first appear 5 to 6 days after exposure to the virus, although it can range from 2 to 14 days. For this reason, people who might have been in contact with a confirmed case are being asked to self-isolate for 14 days
- Most COVID-19 cases appear to be spread from people who have symptoms.
- Universal Standard Precautions assume that all people demonstrating flu-like symptoms are potentially infectious
- Transmission of infection can be reduced by taking appropriate precautions.

Symptoms:

Fevers	Vomiting	Sore throat
Cough	Fatigue	Runny nose
Sneezing	Headaches	Respiratory distress

2. TRAINING - Equipment hygiene

- All equipment must be kept thoroughly clean
- Cleaning items that can be immersed in water:
- Dismantle items and rinse in warm water
- Wearing heavy-duty gloves, thoroughly scrub with hot water and soap or detergent
- Rinse in hot water (not less than 70°C) and allow to dry
- Cleaning items that cannot be immersed in water: e.g. electrical equipment:
- Wear heavy-duty gloves
- Clean with a clean cotton pad saturated with 70% w/w ethyl alcohol
- Allow airing to dry.

3. Reporting possible COVID-19 infection

- A WORKER MUST NOT PRESENT AT WORK IF:

I. You, or anyone you've been in close contact with, have travelled overseas in the last 14 days
II. You have been in close contact with someone with a confirmed case of COVID-19
III. If you exhibit any COVID-19 symptoms
IV. Report to your supervisor
V. Seek medical advice immediately

If a worker is diagnosed with COVID-19, they must not return to work until medically cleared to do so.

4. Arrival at site & performing the activity

- Before attending the job, the supervisor will confirm the following:

o Are you or anyone at the residence/workplace experiencing any of the following symptoms:

- Fever?
- Flu-like symptoms, such as coughing, sore throat and fatigue?
- Shortness of breath?

o Have you, or anyone at the residence/workplace been in close contact with, travelled overseas in

the last 14 days?

o Have you or anyone at the residence/workplace been in close contact with someone with a confirmed case of COVID-19?

- *If upon arrival or during the task anyone exhibits COVID-19 symptoms report to supervisor and leave the site immediately*
- Workers must maintain good personal hygiene at all times.

Social Distancing:

- Workers must follow social distancing rules
- Remain at least 1.5 meters from other individuals wherever possible (1 person per 4 square
- meter rule)
- Organize work to only have single people in small areas, e.g. rooms wherever possible

Supervisor to confirm the presence of COVID-19 at the workplace and **workers** to follow control measures
