Job Description

1. General Details

Job Code	
Job Title	Director, Research Computing
Reporting Line	Senior Vice President Research and Development
Department	Research Computing

2. Job Purpose

The Director, Research Computing is responsible for the development of the University's research computing capabilities, overseeing the operation and continuous improvement of specialized computing facilities that support research programs at the University.

3. Key Roles & Responsibilities

Strategic Responsibilities

- Drive the formulation of the Department's strategy, as well as annual business plans.
- Develop the Department's policies and procedures, adhering to the overall business objectives of the University, ensuring they promote leading practices and excellence.
- Develop and manage the Department's budgets; monitor the performance of budgets and report back on a timely basis to ensure that divergences are addressed promptly.

Operational Responsibilities

- Establish the short and long-term goals for the operation and improvement of research computing; set priorities, assign responsibilities, and establish timetables, as well as project future needs.
- Establish policies and procedures applicable to research computing, including, but not limited to, user access, system security, license management, and fees/charge-back accounting, in line with leading practices and legal compliance.
- Participate in committees and advise on general priorities and mechanisms for allocation of resources (usually computation, software and the time of professional IT staff) to achieve research objectives at both individual, project and wider University levels.
- Monitor the level of IT resources needed to support ongoing and planned research projects.
- Identify leading technologies in research computing in order to develop the University's capabilities into a world-class level supporting high-quality research and attract external interest and engagement.
- Work closely with researchers at all levels to understand their requirements and provide professional advice on how research computing could contribute in addressing those requirements.
- Ensure development of awareness and training tutorials and informative material for students, faculty, and staff about research computing techniques, services, and facilities.
- Plan and manage financial resources to support the development and operation of research computing at the University.

- Liaise with senior members of research teams and decision makers to discuss issues and implement service improvements.
- Work closely with ICT sections with regards to the overall design, development, maintenance and support of the overall research computing back-end systems.
- Explore possibility of collaborating with external research computing facilities.
- Ensure adherence to the University's information security policies and procedures, and report breaches or other security risks accordingly.
- Ensure coordination with other departments to facilitate the accomplishment of tasks and responsibilities, as and when needed.
- Perform any other tasks assigned by Line Manager.

Supervisory Responsibilities

- Provide coaching, guidance and mentoring as required to enhance the internal capabilities of the team and ensure the achievement of established objectives and plans.
- Recommend appropriate training courses as per the pre-determined training needs, evaluate their effectiveness, and monitor their results.
- Carry out performance appraisals for subordinates according to planned schedules and recommend necessary actions as per the applied practices.
- Conduct periodic meetings with subordinates to ensure that priorities are clear and workflow is running smoothly.
- Follow-up on employees' administrative affairs such as vacations, leaves and other administrative and related affairs.

4. Qualifications & Experience

Required Qualifications
Bachelor Degree in Computer Engineering/Science or related area, Master's degree preferred.
Required Experience
A minimum of 14 years of experience directly related to the duties and responsibilities specified, of which 5 years should have been in a Senior Managerial position, preferably in higher education.
