Job Description

1. General Details

Job Code	
Job Title	Manager, Scientific Computing Support
Reporting Line	Director, Research Computing
Department	Research Computing

2. Job Purpose

The Manager, Scientific Computing Support is responsible for managing the support provided to faculty and researchers in using the research computing resources and applications, as well as collaborating with other ICT sections in maintaining back-end systems.

3. Key Roles & Responsibilities

Strategic Responsibilities

- Contribute to the development of the Department's strategy, as well as annual business plans
- Contribute to the development of the Department's policies and procedures, in line with the overall business objectives of the University, ensuring they promote leading practices and excellence
- Contribute to the development and management of the Department's budgets and report back on a timely basis to ensure that divergences are addressed promptly

Operational Responsibilities

- Support researchers by understanding their research computational needs and recommend suitable applications and other research computing resources available at the research center, such as the wide range of applications running on Linux, Matlab, Ansys Fluent, etc.; this may include assisting them with grant proposals that have a strong High Performance Computing (HPC) component to describe the utilization of HPC resources in their research
- Ensure to resolve faculty, research staff and student computing resource issues and provide programming consultancy, code optimization and resolve users' programming issues
- Work with the team to build, install and test applications
- Develop awareness and training programs for students, faculty, and staff with regards to research computing techniques, services, and facilities, including HPC application training to help users parallelize, debug and optimize their applications. This involves conducting regular trainings workshops and tutorials, as well as one-on-one training for new users
- Liaise with research teams and involved decision makers to discuss issues and implement service improvements
- Perform required regular maintenance and upgrades in coordination with external vendors
- Work closely with Ankabut to arrange for the periodic maintenance and support of the research computing back-end systems
- Collaborate and explore potential partnerships with various educational and research institutions and government entities for expanding the Research Computing capabilities
- Ensure adherence to the University's information security policies and procedures, and report
