SUBJECT: Access, Allocation and Use of Research Computing Resources

RELATED DOCUMENTS

Research Computing Governance Terms of Reference; KUP 1050 Record Retention; R&D 4710 Scientific Computing Support; R&D 4720 Academic Software Management.

SECTION 1 POLICY STATEMENT

1.1. Khalifa University of Science and Technology enables and supports world class research through provision of leading edge research computing services, expertise, consultancy and training.

SECTION 2 SCOPE AND APPLICABILITY

2.1. This policy document applies to all faculty, staff, and students and any other affiliates of Khalifa University of Science and Technology, all referred to here as "Users".

SECTION 3 PURPOSE

3.1. To ensure that computing resources and services are used effectively by defining, regulating and monitoring the access, allocation and use of available Research Computing (RC).

3.2. This policy defines who is eligible for access to KU RC resources, how the resources are allocated and shared among users and the conditions of acceptable use of these resources.

SECTION 4 DEFINITIONS

The following definition(s) apply to this policy document:

4.1. **Research Computing (RC) Resources:** All centrally provided research computing facilities, such as hardware, software, HPC cluster, etc. that are managed by the Research Computing department.

4.2. **High Performance Computer (HPC) Cluster:** A computing system platform incorporating software architecture implemented from off-the-shelf computing hardware to provide high-performance and data-intensive processing.

4.3. **Research Computing Steering Committee (RCSC):** The governing body of Research Computing.

SECTION 5 PROVISIONS AND GUIDELINES

5.1. *Conditions of Use of RC Resources*

5.1.1. All research computing facilities, including HPC systems, operated and maintained by the department of Resource Computing (RC) may only be accessed by authorized users and are subject to KU's policies on the appropriate use of Information Technology. In addition, the use of this system is routinely

monitored and recorded and anyone accessing the systems consents to such monitoring and recording.

5.1.2. All users utilizing the HPC or other research computing facilities, must acknowledge the use of facilities in their publications. Suitable text will be provided by RC and published and made available to users

5.1.3. Users may be required to complete training courses before being given access to RC resources.

5.2. *Resource Allocation*

5.2.1. In principle, all RC resources are to be shared fairly by all users. This ensures that all users have access to a baseline level of service. Requests for additional resources are considered by the RC department and assessed by evaluating the need, the availability of resources and the impact on other users. This applies to all RC resources, whether this is storage, compute time or support.

5.2.2. If a request for additional resources is substantial, RC may decide to refer the matter to the Research Computing Steering Committee (RCSC).

5.2.3. For demanding projects, it is normally possible to use project funds to purchase additional infrastructure/support for the project's exclusive use, or alternatively share the additional resource as appropriate.

5.3. *Account Eligibility and Communication*

5.3.1. All full-time Khalifa University of Science and Technology (KU) faculty are eligible for accounts on centrally owned and managed research computing systems. Students, research support staff, staff, contractors and any other affiliates are eligible for accounts provided that they have an authorized faculty sponsor.

5.3.2. The KU email account, or the email account supplied at account creation by external affiliates, is the official means of communication. All research computing announcements and communication regarding downtime, maintenance, etc. is sent to the account holder's email. It is the responsibility of each account owner to read these messages.

5.4. *Storage Allocation*

5.4.1. Quotas: Appropriate quotas may be placed on storage systems. Users exceeding the allocated quota may be unable to make use of the facilities until they reduce their usage to acceptable levels.

5.4.2. File expiry: Unused files for a period of time defined, and published, by RC may be automatically deleted from research computing file systems in order to maintain productivity and file system performance. File owners will be notified of the expiry of their file before deletion.

5.4.3. Deactivated Accounts: All data belonging to an expired/deactivated account will be deleted after a period of time defined by *KUP 1050 Record Retention.* File owners, or their faculty sponsor, will be notified of the expiry of their account before deletion.

SECTION 6 RESPONSIBILITIES

6.1. The Research Computing department is responsible for enforcement of this policy document in order to ensure the effective use of resources.
6.2. All users of RC resources are responsible for complying with the conditions of use of RC resources, as well as the applicable ICT acceptable use policies and guidelines.
6.3. The RCSC is responsible for making final decisions concerning resource allocation and priorities for RC resources.

SECTION 7 REVIEW STATEMENT

7.1. This policy document is reviewed once every four (4) years, or more frequently when requested by the Senior Vice President for Research.

SECTION 8 APPROVAL AUTHORITY AND REVISION HISTORY

This policy document has been approved by the Khalifa University of Science and Technology's Board of Trustees. Original documentation is on file in the Office of the President. The online version is definitive.

First disseminated by the Office of the SVP Research and Development on 01 January 2018
