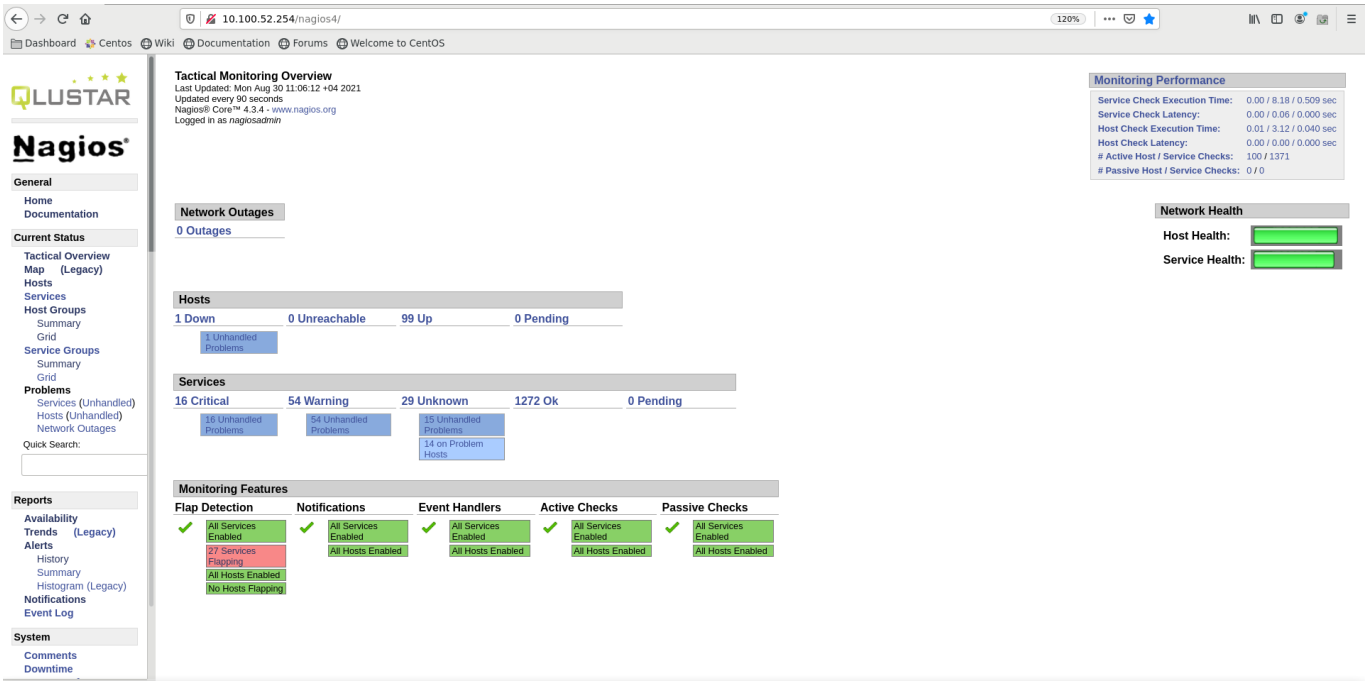
Monitoring-on-AlMesbar

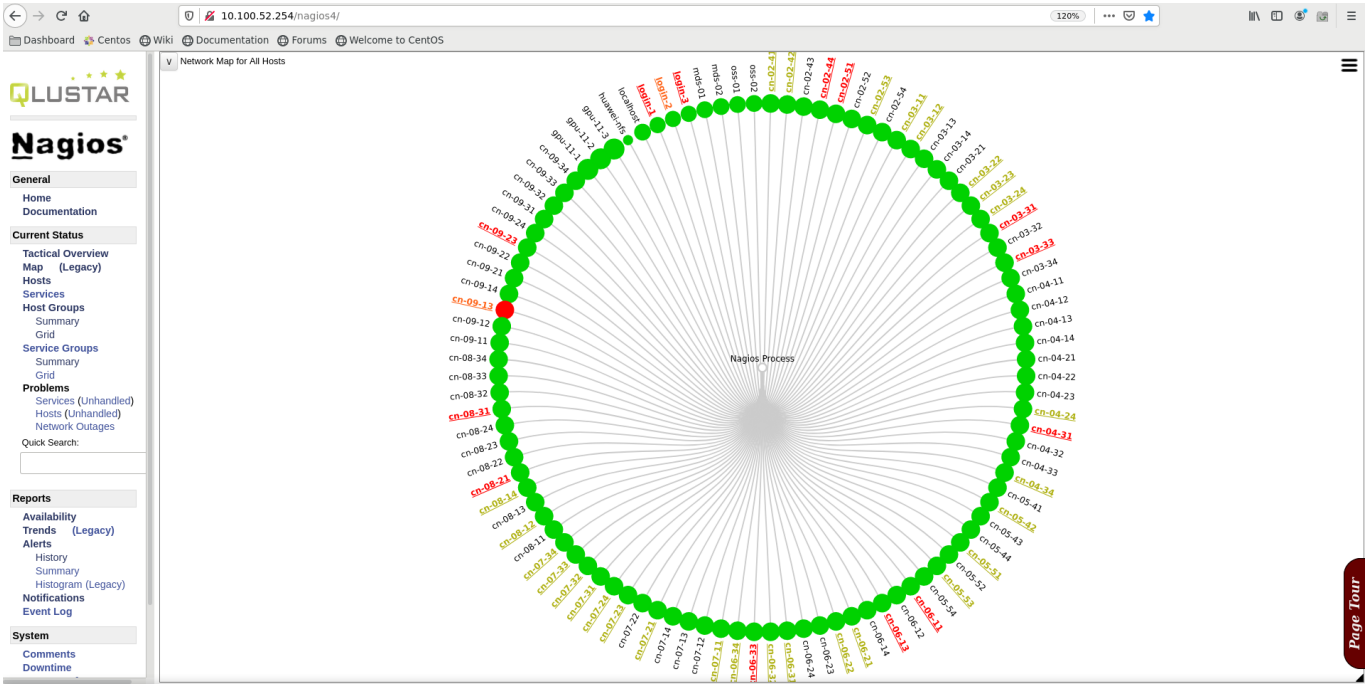
We are using Nagios for monitoring the Almesbar HPC cluster.

Nagios can be accessed in link http://10.100.52.254/nagios4/

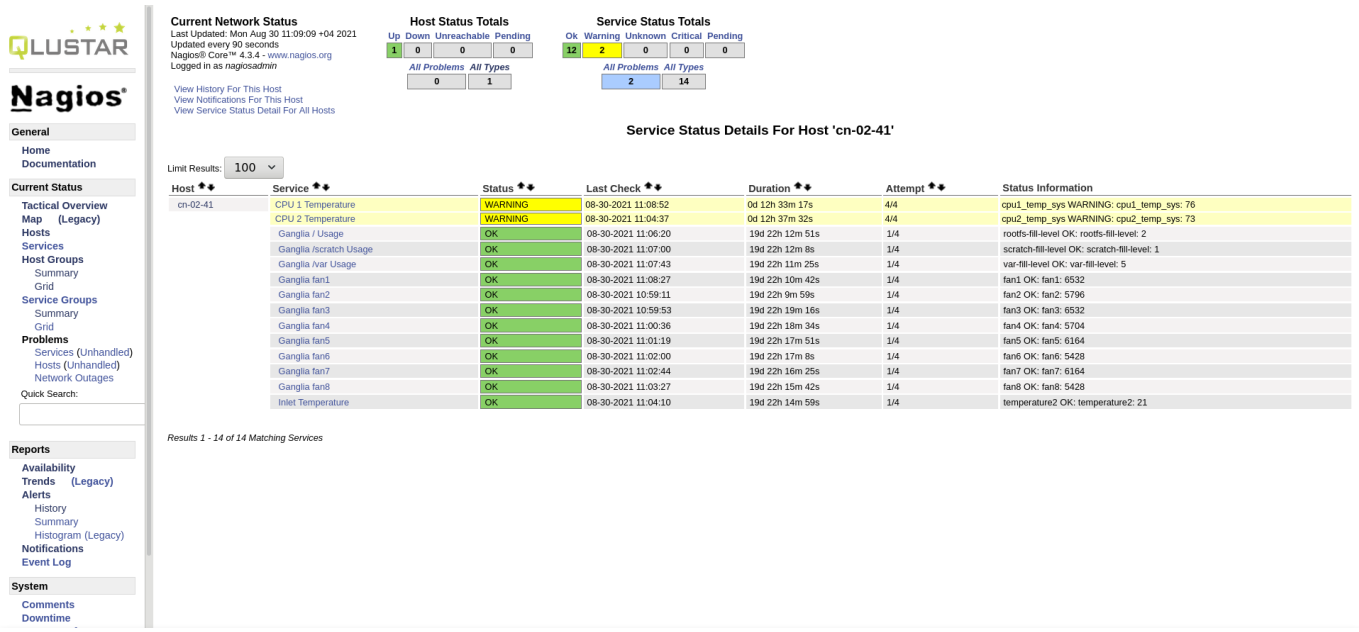
Nagios Almesbar Monitoring Overview



Almesbar HPC Nagios MAP



Almesbar Compute node Monitoring on Nagios



Nagios Email Alert Example

Notification: PROBLEM
Host: MELL1
Host Alias: Mellonax switch1 - HPC
Address: 10.106.23.220
Date/Time: 07-14-2021 13:31:31
Additional Info: (Host check timed out after 30.01 seconds)
Total Servers Up: 153
Total Servers Down: 31
Actions: Acknowledge

Nagios Email Alert Example

Notification:	**PROBLEM [UNKNOWN]**
Service:	**Fan**
Server:	**GPU01**
Server Alias:	**MI HPC GPU01**
Address:	**10.106.23.97**
Date/Time:	07-13-2021 16:11:21
Additional Info:	Unknown
State Duration:	**13054** mins.
Service ExecTime:	**0.042**
Actions:	Acknowledge
