| Facility Section: | | | | | | | |
| Time of Issue: | | | | | | | |

## GUIDELINES ON HOW TO COMPLETE THE COLD WORK PERMIT

1) The Facility Section Engineer/ Contractor requesting the permit should complete Section (1) of the permit.
2) Section (2 A, B, C & D) of the permit shall be completed and signed by the Facility Section personnel responsible of the work to be performed. The Security Section will also identify in Section (3) the authorized Gas Testers who are to undertake the gas testing (KU Employee).
3) Section (3) combustible gas, hydrogen sulphide and oxygen tests shall be conducted by a certified and authorized Gas Tester (GT) **other than the Contractor**, as required by the Security Section and the results entered into Section(3). For Confined Space Entry, the results shall be entered on the certificate itself.
4) The Facility Section Engineer, declaring that he has personally checked the work requirement and precautions identified by Facility Section, approves work to proceed, specifying the date and start time of work.
5) The Contractor shall also sign stating that he will abide the conditions and precautions stated in the permit and that he will conduct a TBT immediately before commencing the work. A TBT must to be conducted by the Contractor prior to starting work each day and on shift changes.
6) A CWP has a total duration of 7 days provided that the permit conditions remain unchanged, and that the precautions are acceptable for the job to continue safely. If the conditions changed a new CWP should be issued.
7) The Contractor must return the original copy of the permit daily to the Security & Facility Division Officer to obtain the initials of Security Section and Facility Section for extension. Repeat gas testing (if required by the Security Section) must be conducted prior to extending the permit with the results being registered on the reverse page of PTW.
8) Permit Cancellation/ Close-out shall be signed by Contractor/Facility Section Engineer declaring that the work has been properly performed and the worksite has been left in tidy and safe condition. If work is incomplete they shall specify its condition. In all cases the Contractor's copy (Original) is to be returned to the Security & Facility Division.
9) The Facility Section will check the site confirming that the worksite is left in a safe and tidy condition, ensures that Permit has been registered and logged in PTW Record Register, and signs permit cancellation/ close-out.
10) Finally, the Security Section will ensure that related certificate(s)/ permit(s) (Confined Space Entry certificate) are closed or remain in place. He ensures that all inhibits are re-instated, and signs the permit cancellation/ close-out.
