Samer Rasmi Abu Khadra.

Objective

To obtain a challenging position in a dynamic organization that would give me the opportunity to present my leadership and technical skills in administering networks/systems and implementing security measures.

IT Skills

- Win NT/2K/XP/2003,2008, Linux, Microsoft ISA, MOM, Exchange 2003/2010, SQL, Microsoft® Hyper-V, Microsoft® SCCM 2007, WSUS, DFS, Windows PowerShell Scripting, VMware™ Virtualization and Backup Solution (Veritas NetBackup, CommVault).
- Juniper Security Products, Foundry Networks Switches, Brocade Switches, ISS IPS/IDS, Cisco Switches/Routers and Antivirus Tools (Symantec, TrendMicro, MacAfee)
- Websense, HP-Open View, Iron View Network Node Manager.
- HPCC (Bright Computing - ClusterVision)

KEY Strengths

- Energetic, well-organized, positive, and self-motivated
- Unique ability to adapt quickly to challenges and changing environments
- Personable, articulate, and professional; compassionate and positive towards achieving goals
- Communication, Interpersonal, Analytical, Leadership, & IT Skills: OS Windows (Workstation & Server)
- Creative Thinking & Troubleshooting, Devising and Supporting Enterprise-wide Solutions & Desktop Deployment.

Experience

Sep 2009 – present **The Petroleum Institute, (ADNOC)** **AD, UAE**
Head of Infrastructure & Communication Services.

IT Architecture Planning & Management

- Define the blueprint and standards for how application software, data, system software, hardware, and the physical network must be designed, built, and integrated within the enterprise to deliver desired results and serve customers;
- Validate the architecture against requirements and assumptions to ensure that the architecture aligns with the technical, security, and business environments;
- Develop and implement review guidelines, review compliance reports, and ensure action is taken for non-compliance cases;
- Provide design management, technical direction, and decision making on the data center architectural designs;
- Lead the definition and testing of capacity management and disaster recovery plans.

IT Security Management

- Lead the definition of an enterprise security strategy, security frameworks, standards, and processes for how application software, data, system software, hardware, and the physical network must be designed, built, and integrated within the enterprise to deliver hardened security solutions;
- Direct risk assessment and approve closure of all identified risks in a timely manner;
- Monitor and report on the developed risk register;
- Manage reviews of security architecture of application software, data, system software, hardware, and the physical network and ensure that it continually complies with the defined security blueprints;

Live-services Management

- Manage the provision of escalated technical support for application operations, servers, networks, security, and data center facilities;
- Direct and control the delivery of ongoing, day-to-day business-critical live services to ensure optimal reliability, availability and performance of the technology platforms;
- Manage the operation of the delivered applications in the production environment by ensuring performance, reliability, availability and security are in line with agreed service levels;
- Manage the delivery of reactive and proactive maintenance for the live infrastructure services to eliminate causes of service disruption and manages the resolution of problems and underlying causes;
- Monitors service levels, manages service agreements with external parties and provides service level reports to IT management;

Administrative Responsibilities

- Organizing the team's mission and project objectives.
- Preparing the departments' budget.
- Arranging, directing, managing and leading tasks within the Infrastructure and Communication department.
- Conducting interviews and hiring qualified Infrastructure, Telecom & Network staff.
- Distributing assignments and tasks to the appropriate team members.
- Clarifying any misconceptions. Targeting deadlines.
- Communicating with IT Director on department's progress and requirements.
- Developing/maintaining Infrastructure and Communication department Policies & Procedures
- Assist in problem solving and collaboration.
- Conducting the implementation of administrative Enterprise solutions.
- Participated in different task forces and committees in PI.
- Setting the IT position job descriptions.

Jan 2007 – Aug 2009: The Petroleum Institute, (ADNOC) AD, UAE
Team Leader (Systems & Network Section).

- Defined the team with a vision of the project objectives.

- Prepared & followed-up the section/Department budget.
- Motivate the team members to accomplish their tasks and participating in the work of the team.
- Communicated assignments, milestones and deadlines to the team and individuals.
- Observed and relayed training needs and requests to IT Manager.
- Facilitated problem solving and collaboration.
- Developed/maintained IT Policy & procedures.
- In-Charged of the IT Department (Acting Head) when needed.
- Served as a member for the hiring of the IT Director in PI.
- Prepared the IT position jobs description

Jan 2005 – Dec 2006: The Petroleum Institute, (ADNOC) AD, UAE
Senior Systems/Security Engineer

- Manages the operations and activities associated with the computer network and telecommunications services; coordinates requests, acquisitions, installations, system designs/reconfigurations, maintenance, and servicing of all networks, client-servers, and telecommunications supporting equipment.
- Performed day-to-day administration and operational functions of our network/systems environment in addition to the implementation consisting of about 1700 users /35 Servers, and security devices/software (Juniper Firewall,
- ISA 2006, Websense Security Suite, ISS IPS/IDS, Bluecoat Cache Box,
- Symantec Antivirus, Trend Micro IMSS, Foundry Networks Switches, IronPort Mail Gateway). User definitions, port activations, IP address via VLAN assignments, and all network related issues. Maintaining, configuring, installing and testing network hardware and software, included but not limited to switches, hubs and firewalls.
- Monitored, collected and prepared statistical data for analysis on network performance and availability. Acquisition, configuration, testing, implementation, and troubleshooting of network/systems related services. These include, but are not limited to, Web, E-Mail, DNS and DHCP, and other
- Windows 2003/2000 services. Maintained systems, databases and web pages.
- Administered user accounts. Responsible for day-to-day level 2 problem determination and resolution of the networking/systems environment.
- Documented procedures. Formulated, developed, and implemented integrated network architectures for our network/computer systems.
- Acted as the implementation control resource for network technical feasibility studies, provided the planning function and project management during the implementation of project engineering work, and co-ordinate and manage equipment upgrade, retrofit and routine maintenance programs.
- Performed technical evaluation on a Departmental level and Organization
- Level for all network, system and security requirements.
- Supported the Operations and Maintenance for all security related issues on a network and systems level.

Dec. 2003 – present **The Petroleum Institute, (ADNOC)** **AD, UAE**
Systems Engineer & & IT Helpdesk

- Offering on-going operational support including operating systems releases, upgrades, service pack installations, bug fixes, security updates, and any system change activities.
- Observing system performance, classifying and repairing any technical problems arising.
- Structuring and testing the validity of new systems (laptop and desktop).
- Serve as Tier 2 support to the help desk to resolve desktop system issues as reported by the end-users.
- Securing troubleshoot problem areas (in person, by telephone, or via e-mail) in a timely and accurate fashion.
- Offering end-user assistance where required.

Sep. 2001 – Dec. 2003 **Al Bawardi Computers (ITQAN)** **AD, UAE**
Systems Engineer

- Install, implement, configure and supervise all the technical support and systems/network duties.
- Provide solutions and configuration for all quotations in the purchasing department.
- Direct interaction with customers via telephone, E-mail and Personal.
- Providing full customer service functions by answering queries and attending to their requests.
- Taking responsibility for finding solutions for customer problems.
- Using effective communication style to build rapport with customers along with internal and external member to gain commitment.
- Producing reports and giving feedback with regards to requests and complaints from customers.

Aug. 1999 – July 2001 **Modern Island Computer System** **AD, UAE**
Presales Engineer

- Researched and understood customer environment and goals.
- Interacted with the engineering teams to provide solutions to complex technical issues. Prepared and delivered effective presentations.
- Provided timely and accurate answers for sales personnel and customer requirements.
- Developed accurate and cost effective pre-sales product configurations/pricing.
- Developed and delivered informal technical training to customer.

Feb. 1998– Aug. 1999 **Al Bawardi computers (AB Computers)** **AD, UAE**
Computer Operator / IT Technician

Education

1996 – 2001 Ajman University of Science and Technology AD, UAE
B.Sc. in Electrical Engineering / Communications Engineering

Certifications and courses

- Completed Interconnecting Cisco Network Devices
- Completed MacAfee 101 (VirusScan 4.5.1 Netshield 4.5 & ePO 2.5.1)
- Completed MacAfee 201 (Groupshield for Exchange 5.5 & 2000)
- Completed Microsoft SharePoint Portal Server Workshop
- Completed Basic Switch/Router Configuration & Management
- Completed Introduction to Web Switching and Load Balancing
- Completed NetScreen Firewall/VPN Certification Track
- Completed Ethical Hacking and Countermeasures Certification Track
- Completed 2273: Managing and Maintaining a Microsoft Windows Server 2003 Environment
- Completed 2276: Implementing a Microsoft Windows Server 2003 Network Infrastructure Network Hosts
- Completed 2277: Implementing, Managing and Maintaining a Microsoft Windows Server 2003 Network Infrastructure Network Services
- Completed 2279: Planning, Implementing & Maintaining a Ms Windows Server 2003 Active Directory Infrastructure
- Completed 2400: Implementing and Managing Microsoft Exchange Server 2003
- Completed Configuring NetScreen Secure Access (CNSA)
- Completed Advanced NetScreen Secure Access (ANSA)
- Completed 2824: Implementing Microsoft Internet Security and Acceleration Server 2004
- Completed Fire Safety and Emergency Evacuation (Level I).
- Completed Virtualization 2010 Workshop
- Completed Dell Blade Server Configuration and Troubleshooting
- Completed RH131 - Red Hat Linux System Administration
- Completed VMware™ vSphere 4.1: Install, Configure, Manage.
- Completed Business Ethics & Customer Focus.
- Completed simplification of work procedure course.
- Completed 10231A: Designing a Microsoft SharePoint 2010 Infrastructure
- Completed E R12 Oracle User Management Overview Ed 1
- Completed R 12.x Oracle Applications System Administrator Fundamentals Ed 1
- ITIL Foundation Certificate in IT Service Management
- Completed Securing Email with Cisco Email Security Appliance (SESA)
- Completed 20410 -Installing and Configuring Windows Server 2012
- Completed CommVault Core Fundamentals - EMEA - V10
- Completed CommVault Implementation and Maintenance - EMEA - V10
- Data Center Infrastructure Specialist (DCIS)
- Data Center Engineering Specialist (DCES)
- Data Center Infrastructure Expert (DCIE)
- Completed VMware vSphere: Install, Configure, Manage [V6]
- Completed VMware vSphere: Optimize and Scale [V6]

Projects

- Designed and implement disaster recovery site to ensure the business continuity (ongoing project).
- Designed and implement High Performance Computer Cluster (HPCC) to serve the research program on The Petroleum Institute.
- Designed and implemented a whole network growth from two physical building to twelve buildings and two geographical locations including but not limited to switch/router configuration and active component management strategies.
- Designed and implemented a full network security measure for the PI which included 4 firewalls, IDP/IDS and RAS (dial-up and SSL VPN using strong authentication) using Windows 2003 Radius.
- Designed and implemented security measures to secure the Windows 2008/Exchange 2010 sever infrastructure which included AD and OU design and group policy design and configuration, etc.

Personal Information

- Date of Birth: 22/12/1977
- Nationality: Jordanian
- Marital Status: Married
- Languages: English and Arabic
