Final Report on the Closure of Arzanah Library

Introduction

The decision to close the Arzanah Library branch was undertaken at the request of Khalifa University's Space Planning Committee, with the intention of making offices for postgraduate students. The initial plan began in September of 2021. As part of the plan, the library staff evaluated the collection, equipment, and furniture of the library, deciding what needed to be kept and shifted to either the Main Campus Library or the Habshan Library at SAN Campus, and what items should be discarded.

Collection Evaluation and Selection

At the time of the decision to close the library, Arzanah had a collection of 13,744 active items (consisting of books, maps, multimedia, models, and other material), and an additional 1,240 items that had already been selected for discarding earlier in the year 2021, before the decision to the close the library was made. These items were still physically located at the library. So there were a total of 14,984 items that should have been at the library.

The librarians of Khalifa University, led by the Collection Development Librarian Alia Al-Harrasi, began a complete investigation of each of these items to determine what the proper disposition would be. The items were examined for quality and timeliness, whether the library already had multiple copies, and the physical condition of each title. As a general guideline, it was decided that any item that the library already owned three or more copies of at the other branches would be discarded. Of the remaining items, all the six librarians of the university evaluated and rated the desirability of all items, and voted to retain or discard.

When applying the library's collection development policy, it was found that 315 items should be kept and not subject to evaluation. Of the remaining items, 6,609 were chosen to be retained, for a total of 6,924 items. Of these, 5,523 were assigned to the Main Campus Library and 1,086 to Habshan Library. The remaining 6,317 items were selected to be discarded. There were also an additional 503 missing items that could not be found.

Previously Discarded	1,240
Missing	503
Selected for Discarding	6,317
Moved to Main Campus	5,838
Moved to SAN Campus	1,086
Total	**14,984**

A public service team led by Muna Abdulla then began the physical work of verify the location and condition of all items and arranging for the packing and shifting of the items that were

being retained. The items were processed by the team and their statuses were updated in the library catalog system by the catalogers, led by Cataloging Librarian Huda AlAlawi and the Cataloging Officer.

The retained items were all shifted to their new locations during the month of January.

The remaining items to be discarded were packed and shifted to Habshan during the first week of February where they await approval from the write-off committee.

Equipment and Furniture

In addition to the library materials, there was also a considerable amount of equipment and furniture at the library to be evaluated for possible transfer to Main Campus or Habshan Library. Walter Brian Hall led the effort to identify equipment and furniture that could be used at the other branches, and to work with FMS and IT to arrange the transfer of IT equipment and library furniture.

There were 60 public computers at Arzanah, of which 42 were so old as to be not worth keeping. The remaining 18 computers were sent to Habshan, where they were used to replace several very old public computers there. The three printers are being moved to Habshan, where one will become a staff printer, and the other will be placed on the first floor. The third will be shifted to Main Campus where it will be placed on the third floor for public use.

One of the RFID security gates will be moved to the first floor of Habshan, to provide security for the exit there. The other gate will be given the CTL for use at the Hive on Main Campus.

Most of the shelving will be discarded, as it is not needed. A few ranges will be placed in Habshan on the first floor in the Special Collections area, to replace the metal non-library standard shelves there. One short range will be added to the end of the general collection of Habshan, and a few shelves will be added to the Reference Collection on the ground floor. Finally, a shelf from the Fiction collection will be added to the Habshan Fiction area.

Four tables will be moved from Arzanah to Habshan to provide some additional seating and study areas for students. Two map cases from Arzanah will be brought to Habshan to replace two very old map cases there, which will be discarded.

Subject: RE: IT readiness of the labs for the move to SAN campus - Action plan

Good Morning Jacob,

When I counted in October, there were 60 public computers at Arzanah Library. Of these, 42 were the very old (8+ years) Dell Optiplex 9010 model that we want to get rid of. There were 18 "newer" (still multiple years old, but better than most of our current computers at Habshan) computers that we wanted to keep. The list of these is below.

We also wanted to keep one of the printers and have it placed in the staff office (5017) so that we no longer have to share printers with the students.

Please let me know if you need any more information about this. And thank you for your help coordinating this.

Subject: FW: IT readiness of the labs for the move to SAN campus - Action plan

Please see the appended Email. The IT department is trying to accommodate requirements for the movement of departments to the SAN Campus.

In order to meet the requirements, we have plans to upgrade / use / repurpose computers from our store and from sections that are being discontinued at the SAN Campus.

Please do let us know if the following can be approved.

- Request Approval from Arzanah Library (44 Computers) and Arzanah ILC (student Success -28 Computers) to use their computers – as we understand that both will be closed in Arzanah.

Subject: RE: IT readiness of the labs for the move to SAN campus - Action plan

Dear Jacob,

We have completed the first and second actions in below high level plan. Attached is the gathered information of SAN labs with computer details.

Based on the gathered information, we will need to replace 147 computer (as indicated in last column).

We can arrange for the computers as following:

- 75 computer from IT store.
- 44 computer from Arzanah library
- 28 computer from Arzanah ILC (Student Success)

We will need your support to:

- Get the approval from Library and ILC (student Success) to use their computers. As we heard that both will be closed in Arzanah.
- Get the approval from CoE and CoAS to proceed with the computer replacement and OS upgrade based on attached list.

Regards,

Dear Jacob,

#116455 Old public computers in Habshan Library to be removed

by Walter Brian Hall on Mar 23, 2022 12:06 PM | **DueBy : Mar 31, 2022 12:06 PM** KU General SLA

Details Resolution

Description

Good Afternoon,

We have about 18 old public computers that have been replaced by computers from the closing of Arzanah Library. We would like to have these computers removed, as we are no longer using them. They are all on the ground floor of Habshan Library.

Best Wishes,
Walter Brian Hall
