For government trainings, it would be much better to have modern theories put in practice or showcased is real life applications that we can bring to our workplace. Theories are excellent to know however since were not engineers and not taking a full course an introduction to ready to use innovations and technologies that we can learn and use in work would have been a far better experience in feasibility in my humble opinion.

The training program focus on how to program the AI systems which is required as introduction to understand the concept, but then kept follow same method for 3 days.
I expected the training will emphasis more on AI idea's, implementation , benchmarking the best practices, how to use AI to resolve some issues and topics more.

الدورة كانت جيده جدا للموظفين المتخصيصين بالبرمجه الحاسوبية،
كنت اتمنى أن أتطلع لمشاريع قدمت في مجال الذكاء الاصناعي بالطوارئ من قبل فريق أو طلاب الجامعة حتى يتم النظر في مجال تطبيقها في العمل
