Executive Leadership Program

The program is designed to provide a unique learning experience for the executive leaders of Zhenhua Oil and its overseas subsidiaries. The program has a two-fold approach, incorporating technical education with cultural awareness specific to the UAE. The program aims to prepare these leaders with the knowledge and skills necessary to effectively navigate the petroleum industry while also being sensitive to the cultural values and norms of the UAE.

The program has covered the following topics:

1. **Strategic Management of Technology and Innovation:** This course focuses on developing general management tools and analytical frameworks that are particularly applicable to managing technology and innovation in private industry and government agencies. The course identifies strategic and operating challenges commonly encountered in meeting performance, cost, and schedule requirements in new product development and roll-out, and discusses policy, organizational, financial, and program management structures that can help to meet such challenges. The appropriate use of various budget and financial management tools such as earned value and total quality management will be explored in the context of the high project risk often associated with innovative technologies

2. **Quality Management System:** Introduce and apply practical quality control and lean planning tools to ensure full system(s)/sub-systems integrity and efficient operations; quality management systems; and knowledge of quality cost, standards, and tools.

Goals:

- Introduce the Quality Concepts development and implementations
- Define the different approaches applied to Quality systems, processes, Documentation

3. **Introduction to Artificial Intelligence**: This course covers the fundamental aspects of classic and modern Artificial Intelligence. Topics include solving problems by searching, decision tree, and machine learning

4. **Risk Analysis Prospect Evaluation and Exploration Economics:** The course assumes basic or no previous knowledge of uncertainty, risk analysis, or decision analysis; although preliminary to intermediate knowledge of exploration, production, and development of the oil and gas fields is required. Advanced knowledge is a plus.

The course is designed for professional petroleum industry personnel. Both upstream and downstream industry workers will benefit from the workshop. Fundamental risk and decision analysis tools will be thoroughly covered and their applications and implementations will be explained. Case studies and strategy developments utilizing traditional and non-traditional techniques will be the exercises during the workshop. The Monte Carlo simulator is used for risk analyses.

5**. Operational Safety and well-being at work**: This topic likely focused on promoting safety and well-being in the workplace. Participants may have learned about occupational health and safety regulations, risk assessment and mitigation, and strategies for creating a safe and healthy work environment.

Safety at Work - Employers Duties - Employee Duties

Laboratories Tours:

The Petroleum Lab tours provided training delegates with the opportunity to visit various state-of-the-art laboratories within the campus to gain practical exposure.

Artificial Intelligence Lab (AI) - The tour has been designed to give training delegates the chance to witness practical demonstrations and showcase the university's innovative projects and resources and equipment available to students and researchers at Khalifa University.

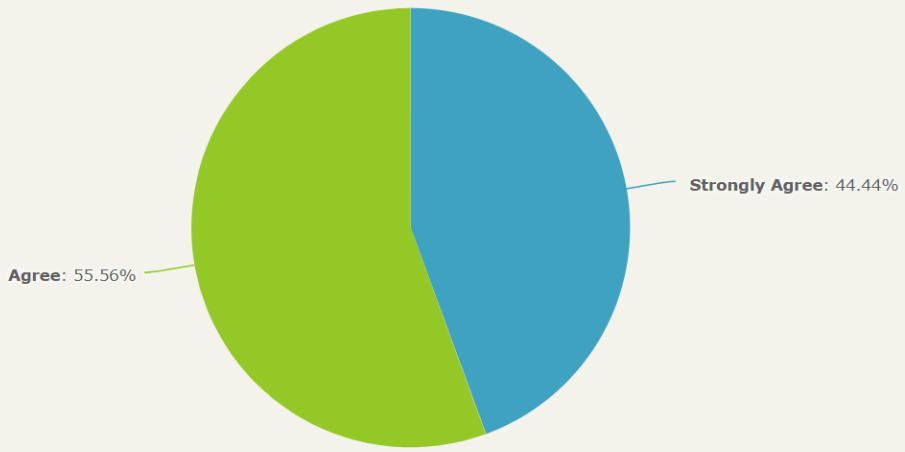
Feedback

The Online survey send out to the training delegates after the program to gather more detailed feedback and encourage participants to share their honest opinions and suggestions to identify areas for improvement and suggestions for future enhancements.

Summary Report

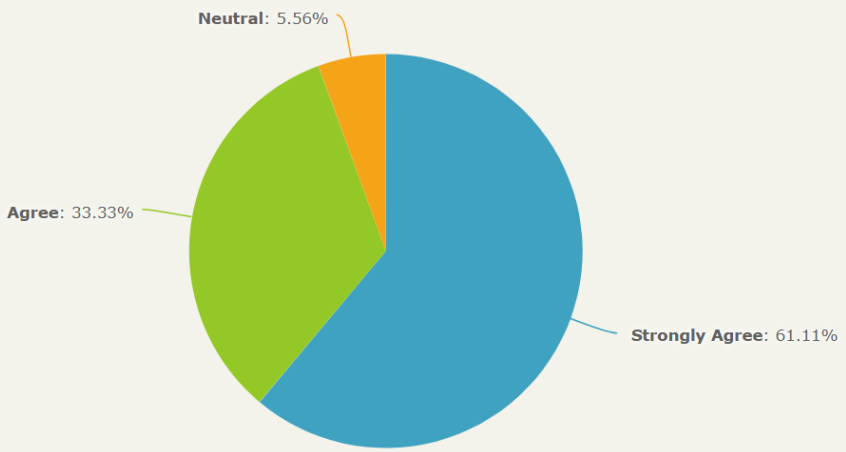
Executive Leadership Program

1. The Instructors delivered the training materials effectively.



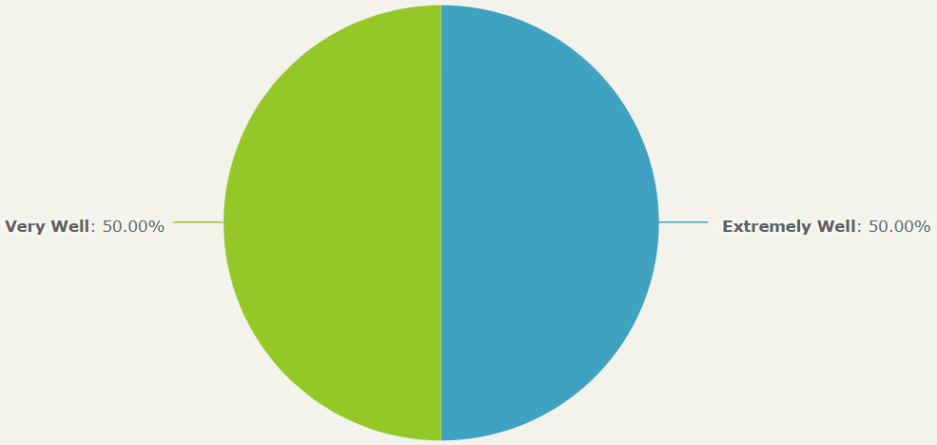
Strongly Agree	44.44%		8
Agree	55.56%		10
Neutral	0.00%		0
Disagree	0.00%		0
Strongly Disagree	0.00%		0
		Total Responses	18
		Skipped	0

2. The Instructors managed the training time efficiently.



Strongly Agree	61.11%		11
Agree	33.33%		6
Neutral	5.56%		1
Disagree	0.00%		0
Strongly Disagree	0.00%		0
		Total Responses	18
		Skipped	0

3. How well did your instructors answers your questions?



Extremely Well	50.00%		9
Very Well	50.00%		9
Somewhat well	0.00%		0
Not so well	0.00%		0
Not at all well	0.00%		0
		Total Responses	18
		Skipped	0

4. What are the three most important takeaways for you from the training program?

Total Responses	17
Skipped	1

- From friend
- HSE, Quality control and AI
- Safety
- Course introduction, colleagues reunion and Certificate
- Philosophy, cutting technology, management tools
- Knowledges for HSE and quality control; 2. Cuture; 3. Business model.
- AI,HSE,Quality Management
- Knowledge. Working experience and free talking
- The way of thinking
- Risk control
- HSE
- The knowledge and methods
- Knowledge
- Friendship
- Professional
- AI technology -2
- Good
- Innovation
- Interesting, professional
- Energy transfer; quality and safety; AI

5. In terms of your career, which topics were the most valuable? Why?

Total Responses	17
Skipped	1

- HSSE
- Quality Control
- Creation of value
- Explorations economic, Quality Management, and innovation, related with my responsibilities
- Sustainablity
- HSE. It is most important for production.
- HSE, SAFETY IS HIGH PRIORITY IN OIL INDUSTRY
- Safety. Safety is always the most important
- Technology management is the most important,because I worked in research center
- ESG. AI .economic evaluation methods for exploration
- It's match with daily work and very useful
- Risk analysis.
- We are in a risk business.
- AI we all will face the replacement pressure from AI that we.need to know the.logic of AI and harnessed the advantage to avoid disadvantage.
- HSE
- 1
- innovation
- ESG, Technology innovation
- Mdelling

6. Overall, how satisfied were you with each topic ?

	Extremely satisfied	Very satisfied	Somewhat satisfied	Not so satisfied	Not at all satisfied	Responses
Strategic Management of Technology and Innovation	**9** 52.94%	**8** 47.06%	**0** 0.00%	**0** 0.00%	**0** 0.00%	17
Quality Management System	**9** 52.94%	**8** 47.06%	**0** 0.00%	**0** 0.00%	**0** 0.00%	17
Introduction to Artificial Intelligence	**9** 52.94%	**8** 47.06%	**0** 0.00%	**0** 0.00%	**0** 0.00%	17

10. Please add additional comments about the Executive Leadership Program and/or instructors. You could focus on particular strengths of the program and/or ways in which the content can be improved.

Total Responses	17
Skipped	1

- company experience
- Digitalize the pre read materials.
- very good
- More introductions on oilfield practices
- Quality and innovation
- It is better for more lessons about business negotiations.
- None
- I think it's useful for my future job
- Good for more classes
- To be more practical in Petroleum business and technologies
- No comments.
- None
- Take more examples
- No
- Case study
- The topic is mainly focus on upstream and Hsse
- More teachers from Engineers

Action plan: Based on the feedback received, develop an action plan to address the identified areas for improvement and incorporating new topics based on the delegates' suggestions.
