UNITED ARAB EMIRATES
THE SUPREME COUNCIL FOR NATIONAL SECURITY
National Emergency Crisis and Disasters Management Authority

الإمارات العربية المتحدة
المجلس الأعلى للأمن الوطني
الهيئة الوطنية لإدارة الطوارئ والأزمات والكوارث

محظور

الرقم: NCEMA-SSD/2021/874
التاريخ: 20 /09 /2021 م

السادة/ جامعة خليفة ... المحترمين

السلام عليكم ورحمة الله وبركاته،،،

الموضوع : تاكيد دورة الاحصاء واستخدام المخططات البيانية الإحصائية

يطيب للهيئة الوطنية لإدارة الطوارئ والأزمات والكوارث أن تهديكم أطيب تحياتها وأمنياتها لكم بدوام النجاح والتوفيق.

بالإشارة إلى عرضكم المقدم بتاريخ 2021/09/16، فإننا نرغب بتنفيذ دورة الإحصاء واستخدام المخططات البيانية الاحصائية حسب البيانات التالية:

- **تاريخ انعقاد الدورة:** 2021 /10 /17-21
- **آلية عقد الدورات:** في مقر جامعة خليفة – أبوظبي
- **توقيت الدورات:** 09:00- 15:00.
- **التكلفة:** 65,550 درهم.

يرجى التكرم بإرسال الفاتورة الأصلية بإسم الهيئة الوطنية لإدارة الطوارئ والأزمات والكوارث مع نسخة من الكتاب في نهاية الدورات.

وتفضلوا بقبول فائق الإحترام والتقدير،،،

مدير إدارة الخدمات المساندة
عبد الغني محمد عبدالغني الخميري

1. Introduction

This proposal is presented by Continuing Education (CE) of Khalifa University in response to the request by National Emergency Crisis & Disasters Management (NCEMA) to support developing their staff in statistical and graphical reporting. Statistical data manipulations and graphical reporting is a very important tool to display trends and enhance the usage of data to improve the results analyses, draw conclusions and, eventually, improve the decision making.

Through this training program, under the title of "Basic Statistical Tools and Graphical Report", the participants receive a hands-on quality training on data manipulation, analysis, display, and usage. Principles of statistical and graphical reporting along with representative case studies to apply these skills are thoroughly deliberated. Completing this program enhances staff technical skills and positively impact their productivity and job efficiency.

2. Training Details

2.1 Course Overview:

The ability to apply Statistics in order to correctly interpret data is becoming increasingly important in several sectors such as finance, engineering and public health. In this course, we introduce how to investigate and manipulate data using excel. Then, we introduce the notion of descriptive statistics by covering univariate and bivariate statistics. In the next part, we cover data visualization by introducing the most important graphing tools. Furthermore, we study the most common discrete and continuous distributions. Finally, we introduce some important topics such as hypothesis testing and confidence interval.

2.2 Course Objectives:

This course is designed to introduce students to basic Statistical tools and Graphical report.

2.3 Learning Outcomes:

After this course, students should have a broad overview of statistical tools and be able to successfully manipulate, analyses, calculate statistics, and visualize data.

2.4 Who Should Attend:

The National Emergency Crisis & Disasters Management Authority (NCEMA)

Copyright@2021 Continuing Education – Khalifa University. All Right Reserved

2.5 Method of Delivery: Teaching/Learning Approaches:

The course will be delivered through a PowerPoint presentation with exercises in Excel.

2.6 Language of Delivery:

Arabic lecture, Course training materials in Arabic.

2.7 Assessment Method:

Pre and Post tests will be conducted to measure the knowledge gained from training program.

2.8 Course Outline:

I. **Introduction to Statistics**

II. **Investigating data in Excel**
1. Basic Data Manipulation
2. Arithmetic Manipulation
3. Basic Functions to Organize Data in Excel

III. **Introduction to Statistics:**
1. Univariate statistics
2. Bivariate statistics

IV. **Data visualization:**
1. Line, Bar Graphs
2. Pie and Pivot Charts
3. Scatter Plots
4. Histograms

V. **Introduction to distributions:**
1. Discrete distributions
2. Continuous distributions

VI. **Sampling Distributions and hypothesis testing**
1. Introduction to Sampling
2. Introduction to Hypothesis testing
3. Confidence Intervals

2.9 Instructor's Profile:

Dr. Mohamed Soufiane Jouini - Associate Professor, Khalifa University.

Dr. Mohamed Soufiane Jouini obtained his PhD in Physical and Engineering Sciences from the University of Bordeaux in France (2009), his MSc on Signal and Image Processing from the Polytechnic National Institute of Toulouse in France (2005), and his Electrical Engineering degree from ENSEEIHT in 2004 with specialization on Signal and Image Processing. Dr. Mohamed Soufiane Jouini is an Associate Professor in Mathematics experienced in numerical simulations to model rock properties based on X-Ray Computed tomography images.

Dr Jouini had several positions in Research and Development centers in industry before Joining Academia. He was research scientist in Digital Rock Physics at TOTAL E&P Research center in PAU, France for the period 2006-2009. Then, he was appointed as Research and development engineer in image processing algorithms for security applications SAGEM SECURITE (IDEMIA) Research and development Center, Paris, France.

He joined the Petroleum Institute of Abu Dhabi Research as research scientist on 2010. Later, he was promoted as Assistant Professor then as Associate Professor respectively on 2014 and 2020.

3. Course Schedule

Course Code	Course Title	Date of Delivery	Course Timing	Number Days	Instructor/Trainer
NCEMA	Introduction to Statistics and Graphical Report	17- 21 October	9:00 am - 3:00 pm	5	Dr. Mohamed Soufiane Jouini

4. Volume and Pricing

Number of Participant	Course Title	Course Fee	VAT 5%	Total Course Fee
20 (max)	Introduction to Statistics and Graphical Report	AED 62,272.50	AED 3,277.50	AED 65,550

Copyright@2021 Continuing Education – Khalifa University. All Right Reserved

5. Terms and Conditions

The above prices include:

- Training Venue
- Training Materials
- Certificate of Attendance
- Catering services (Breakfast, Mid-day snacks, Light Lunch, Coffee, Tea & water all day)
- After the course confirmation/proposal acceptance, Finance will issue the invoice.
- The payment must be received in full a week before the services are delivered.
