1. Purpose:

Khalifa University recognizes its responsibilities to comply with the Abu Dhabi Environment, Health and Safety Management System Regulatory Framework (EHSMS) Code of Practice 04 – First Aid and Medical Treatment, as well as other related International Standards in regard to the First Aid as to Health Authority of Abu Dhabi (HAAD).

2. Scope:

This instruction is to be applied to all KU Employees, KU Internal Service Providers, and Contractors during official University hours.

3. Responsibilities:

3.1 EHS Steering Committee Representative: Responsible for

- Implement, maintain and update this procedure as required.
- Ensure necessary resources are available for an effective implementation and maintenance of this procedure.
- Reporting to top management on the performance of this procedure and any need for continual improvement.

3.2 Section Managers: Responsible for:

- Ensuring that processes needed for this procedure are established, implemented and maintained.
- Participating in all EHS Risk Assessment Review meetings.

3.3 EHS Manager: Responsible for

- Ensure that this procedure is implemented and maintained
- Reviewing the lessons learned from the implementation of this procedure.
- Ensuring the promotion of awareness of this procedure throughout ADM.
- Consolidation of Risk Assessment and carrying out Risk Management activities.
- Overall performance monitoring of this procedure.
- Ensuring that all training requirements are identified through coordination with division Managers and section managers and fulfilled for an effective implementation.
- Establishing, managing and maintaining all required operational control procedures requirements specified in this procedure within KU as per
- Setting an action plan related to identified health and safety related risks and significant impacts and eliminating / mitigating it to ALARP residual level.

Copies of this document available in KU EHS Intranet are only the latest, valid and controlled documents. All other copies are uncontrolled and valid only on the date printed. Last printed: 9/3/2020 3:07:00 PM

3.4 EHS Coordinators: Responsible for

- Effective implementation of this procedure in their respective divisions
- Identifying, evaluating, and calculating risk levels for all EHS health and safety risks and environmental impacts, and implementation / completion of action plans as per EHS Risk Register within their divisions / sections.
- Implementing and maintaining all required operational control procedures.
- Analyze all EHS incidents and accident statistics prior to the periodic updating of risk register and provide necessary advices to the review section's committees.
- Provide necessary guidance to EHS Inspectors and Section Coordinators for carrying out the risk assessments as proactive measurement.
- Effective implementation and maintenance of this procedure.
- Identify all hazardous activities and perform risk assessment in co-ordination with EHS Manager and other concerned personnel.
- Coordinating with other divisions and sections for the implementation and maintenance of this procedure.
- Identifying all hazardous activities in KU and perform related risk assessments.

3.5 EHS Inspectors: Responsible for

- Ensure that all necessary control measures identified and recorded in the risk assessment register are implemented and followed at all site operations.
- Monitoring of the effectiveness of this procedure.
- Reporting non-conformities to EHS Management Committee.
- Participating in all reviews and updating of risk assessments.

3.6 All KU Employees:

- A duty of care to themselves, and other persons, by working safely (e.g. Follow safe systems of work as informed / trained).
- Ensure compliance to this procedure requirement in accordance with their responsibilities.
- To take reasonable care for the health and safety of themselves and of persons who may be affected by their acts or omissions whilst at work.
- To take reasonable care for the environment whilst at work
- Co-operate with their employer to enable them to carry out their legal duties or any related requirements that may be imposed.
- Not intentionally or recklessly interfere with or misuse any item provided in the interests of health and safety or environmental protection.
- Report all incidents, whether the injury is sustained or not.

- Report all unsafe practices or potential hazards. And anything that is hazardous to the environment.
- Attend any training designed to further the needs of health and safety and the environment
- Only carry out work for which they are specifically accredited and work within the constraints of agreed job risk assessments.
- Adhere to any procedures or manufacturer's recommendations that are provided regarding hazardous substances or machinery used at work to avoid risk to safety and the environment
- Familiarize themselves with 'local' health, safety and environmental rules and procedures pertaining to working on any other premises or construction sites. Employees should operate to Municipality standards as a minimum or a premise's standard if higher or specialized.
- Seek advice from their Team Leaders, EHS Manager or the HSEMS Team Leaders if required.
- Support our commitment to reducing our environmental impacts by actively trying to minimize the use of consumables, power and transport by adopting green principals such as double side printing, switching off lights and electrical equipment when not in use.

3.7 Contractors and Suppliers:

- Ensure articles (items) are safe and without risks to health when used, set, cleaned or maintained.
- Ensure substances (materials) are safe and without risks when being used, handled, processed, stored or transported.
- Carry out arranges for the carrying of tests, research or examinations which may be necessary to comply with above.
- Provide information about the use and conditions necessary to ensure that the setting, cleaning, maintaining or disposal of the article or substance is safe, and without risks to health.
- Take reasonably practicable steps to provide further information should new serious risks come to light.
- Ensure that anyone erecting or installing articles for use at work ensures that they are safe and without risks to health when used, set, cleaned or maintained.
- Their employees properly trained and suitably qualified for the level of municipality risk.
- All hazardous materials stores shall have restricted access where only authorized personnel may attend and be clearly identified as such – the

area shall be clearly demarcated and appropriate Signage must be erected, e.g. “Restricted Area – authorized personnel only”.

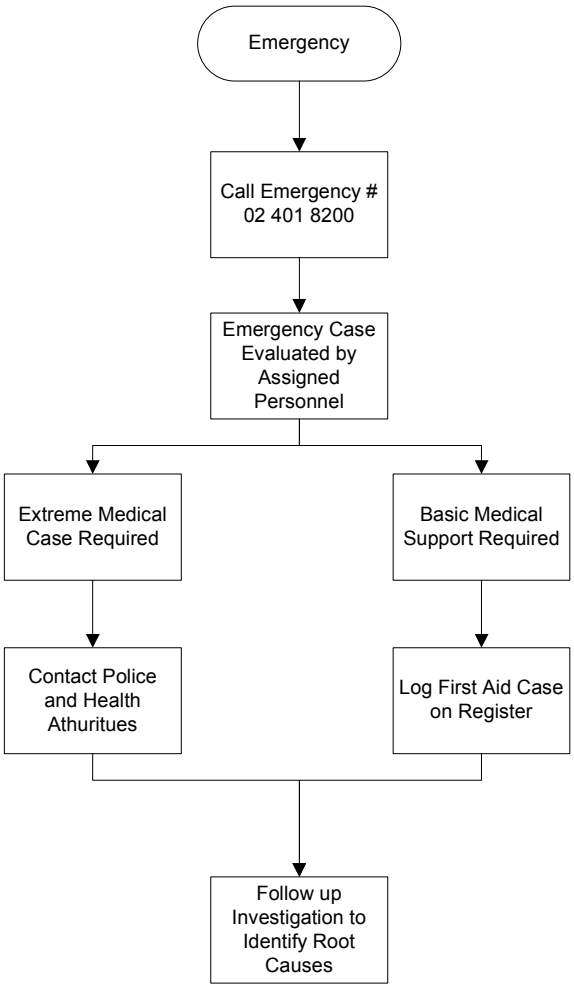
4. Abbreviation / Definitions:

First Aider: A person who has been trained and holds a first aid qualification recognized by the Health Authority of Abu Dhabi (HAAD).

Appointed Person: A person who will take responsibility for the First Aid Box where there is no requirement for a First Aider. Training in basic First Aid should be considered for appointing persons.

5. Procedure:

5.1 Process:



Copies of this document available in KU EHS Intranet are only the latest, valid and controlled documents. All other copies are uncontrolled and valid only on the date printed. Last printed: 9/3/2020 3:07:00 PM

5.2 Provision of First Aid Boxes and Kits:

When calculating the First Aid Kit requirements the number and location of boxes should take account of:

- The layout of the workplace
- The risks of injury in any given area
- The number of employees
- Accessibility

5.3 Standard First Aid Kits:

Contents of the First Aid Kit based on number of employees are shown in **Annexure1.**

Where persons are away from normal First Aid Facilities or there is a special risk of injury then additional First Aid Kits should be provided.

Large or widespread operations may require standard kits to be located at strategic points around the site or premises taking into account the degree of risk of injury and layout of the area.

5.4 First Aid Boxes:

Where mains tap water is not available for eye irrigation, sterile water or sterile normal saline (0.9%) in sealed disposable containers should be provided near the First Aid Box or particular hazard. At least 900 ml should be provided.

- First Aid Boxes should be made of suitable damp and dust proof material and identified by the mandatory “First Aid” sign. Ideally they should be wall mounted or of a carrying case design.
- First Aid Boxes should be kept to the required standard. Contents other than those on the schedule should not be permitted. No drugs of any kind should be kept in a First Aid Box.
- All First Aid Kits will be the responsibility of an identified individual. When they have been appointed this will be a First Aider or, otherwise, an appointed person.
- Consideration should be given to the provision of disposable gloves, and mouth-to-mouth resuscitators.
- All light vehicles are to be equipped with a Personal First Aid Kit. It is the responsibility of the driver to ensure the kit is replenished.

5.5 First Aid Rooms:

Where an establishment presents a high risk from hazards a suitably equipped and staffed first aid room should be provided. High risk could be defined as a large construction site or where access to emergency facilities is difficult.

- The first aid room, its equipment and cleanliness should be the responsibility of an identified first aider /paramedic/nurse.
- The room should be readily available to employees at all times, and not be used for any other purposes.
- Effective ventilation, heating, lighting and arrangements for regular cleaning should be provided and the room clearly identified. Privacy must also be ensured.
- The following facilities and equipment should be provided in a first aid room:
- Sink with running hot/cold water.
- Drinking water when not available on tap and disposable cups.
- Soap, nail brush and paper towels.
- Impervious smooth topped surfaces.
- A suitable store for first aid material. (Sterile dressings thermometer etc.)
- First aid equipment to at least one standard kit plus a stretcher and cervical collar.
- A bowl and suitable refuse containers lined with a special disposable bag.
- Couch with waterproof surface and frequently cleaned pillow and blankets.
- Disposable plastic apron masks and gloves for use by first aiders.
- A chair and appropriate record book.
- Large, blunt ended stainless steel scissors.
- Paper towels

5.6 First Aider and Approved Persons:

Consideration should be given to the following when determining the numbers of First Aiders required:

Copies of this document available in KU EHS Intranet are only the latest, valid and controlled documents. All other copies are uncontrolled and valid only on the date printed. Last printed: 9/3/2020 3:07:00 PM

The number of first aiders and medical staff to the number of employees / workers/other persons shall be in line with the identified risks and hazards of the workplace, the needs of the organization and the employees/other persons, and the requirements of other relevant regulatory bodies, but shall conform to the following minimum requirements:

- At least one first aider per 50 employees per worksite per shift with more than 50 employees.

Note: for requirements related to on duty nurses and medical emergency treatment by physicians, refer to Ministry of Human Resources and Emiratization Ministerial Decision No. (37/2) of 1982 concerning the medical care which employers are obliged to provide to his workers.

First aiders and medical staff working hours should not exceed 12 hours in any 24 hour period and must not exceed the maximum prescribed working hours for adult employees of eight hours per day or forty-eight hours per week, as stipulated by UAE Labour Law.

5.7 Communication:

- All new or transferred employees should be informed of the location of first aid equipment and first aiders when they join the establishment.
- All workplaces should display at least one mandatory notices (white cross on green background) in a conspicuous position stating:
- Location of first aid kits
- Names and location of the first aiders or appointed persons.
- Location of any supplementary equipment facilities.
- Where there is a first aid room, the names and contact arrangements for the first aiders should also be displayed on or near the door.
- Where arrangements are made by a third party to supply first aid provisions this should be confirmed in writing.

5.8 First Aid Safety Checklist:

- Are adequate numbers of First Aid Boxes provided?
- Are boxes suitable and contents correct?
- Are they correctly sited relative to the hazards?
- If lone workers require traveling First Aid Kits, have these been provided?

Copies of this document available in KU EHS Intranet are only the latest, valid and controlled documents. All other copies are uncontrolled and valid only on the date printed. Last printed: 9/3/2020 3:07:00 PM

- If a First Aid Room is required, is it correctly equipped?
- Are all First Aid Certificates up-to-date?
- Are First Aiders available in appropriate locations?
- Are correct notices displayed and information up-to-date?
