		Yes
Attendees / Invited Members		
Dr. Yahya Zweiri	Associate Professor	Yes
Dr. Sami Bashir (Guest)	Director , Technology Management & Innovation	Yes

Agenda items Minutes of Meeting

1. **Minutes of the last SMB – Review: Action Items:**

- Dr. Wesley to ask Gordon on the rates of metallic printing per hour (Gordon (from Strata) advised the team to adopt a lower rate and one that is dependent on the material being printed. Dr. Abdelqader suggested that the best approach would be to use a reasonable benchmark and suggested that a flat rate of 500 USD/hour should be adopted when working with external entities. This was agreed by the SMB.
- Dr. Steve to communicate with Dr. Peter regarding the 3D printing hiring issue (completed)
- Dr. Wesley to follow up with Blake on Abdulla's increment (HR has established a procedure to consider salary increments and indicated that applications for such increases should align with the timeframe adopted for University staff. Dr. Yahya will submit the recommendation for Abdulla in September)
- Dr. Abdel Qader to coordinate with the Provost, Dr. Yahya to send an email to Dr. Abdel Qader regarding SANAD Proposal (Completed)

- Dr. Abdel Qader to work with Dr. Wesley to organize R&D review days and have Strata, SANAD and ARIC to present the projects they are doing (In process)

2. Draft document for marketing ARIC

- Dr. Yahya presented a draft of the publicity and marketing plan for ARIC Digital. The plan is relevant to all of ARIC.
- Dr. Abdelqader suggested adding (visits to ARIC involving UAE Government executives, as well as senior industrial figures and also members from within Mubadala. It was recommended that the team should organize joint events with other entities.
- Dr. Wesley & Dr. Yahya to share the ARIC marketing plan with Sayed and Strata Communications.

3. ARIC Commercialization Assessment meeting with Dr. Sami Bashir (Sami Bashir guest)

- Dr. Sami gave his views on the nature of the commercialization process, ARIC research output, and focused on topics relating to identifying the nature of the projects, understanding the project process as well as how the projects are initiated.
- Dr. Abdelqader stated that ARIC is seeking help to know the process of developing ideas and mechanisms for KU & Strata on how to take these technologies forward to ensure they are commercialized and benefitted from.
- Dr. Sami stated that with the current agreement, it will be difficult to take it further; it was stated that there is a flexibility to do so.
- Dr. Yahya confirmed that there is Statement of Works for each of the projects with SANAD.
- Dr. Steve proposed that the TMI office does the IP assessments and presents the findings to the SMB.

4. Status of the additive manufacturing lab

- Dr. Wesley shared the Lab Operational Summary prepared by Tareq Farrah
- Dr. Abdelqader stated that this is an expensive and critical piece of equipment, the key word is continuity, Dr. Abdelqader advised to hire two people to work in the center.
- Dr. Steve endorsed Dr. Abdelqader's point and stressed on the need to train people.
- The SMB members agreed to keep the job search going for an additional support staff in addition to Tareq Farrah

5. Update on staffing issues in ARIC and retention of ARIC resources

- Mr. Mohammed Ramadan joined on 15th June 2022.

- Dr. Yusra Abdulrahman is starting today 03/08/2022.
- Mohammed Ali has started working on SANAD Project.
- Oussama Abdul Hay (Strata Project)
- Ibrahim Mohammed (Fatigue of 3D printed parts)
- Nora Alahmed joined as a PhD student on composites manufacturing
- Islam Mohammed, an MSc student, joined one of the STRATA projects.

6. Update regarding the KUKA robot in ARIC (DG World)

- Dr. Yahya shared the progress summary

7. Brief updates on the projects in ARIC

- Mariam Al Dhaheri is making good progress, it will be good to invite her to the next monthly meeting in order to update the members on her progress.
- Dr. Sanjeev expressed his interest in developing an activity focused on the Factory of the Future, Dr. Abdelqader stated that before Sanjeev moves to the Factory of Future, an update is required on the coordination of work and what has been done in the applications side in the thermoplastics project.
- It is highly recommend to deliver the existing projects before moving to new one, there is a need to close thermoplastic project first.

8. KPIs for 2022

The outputs under the five KPI headings were presented.

9. ARIC post-November 2022 (funding, leadership etc.)

- Funding: some of the staff contracts will end in November 2022.
- ARIC Leadership: Dr. Yahya is to be appointed officially as the Deputy Director with the Director Dr. Wesley. Any changes can be discussed during the agreement renewal.
- Dr. Steve to notify HR regarding Dr. Yahya's appointment as ARIC Deputy Director

Outcome & Action Items (to be completed prior to next SBM)

- ❖ Dr. Abdelqader to work with Dr. Wesley to organize R&D review days and have Strata, SANAD and ARIC to present the projects they are doing
- ❖ Dr. Wesley & Dr. Yahya to share the ARIC marketing plan with Sayed and Strata Communications.
- ❖ Dr. Wesley to invite Mr. Sayed Al Hashmi to join the next monthly meeting to present the draft ARIC marketing and communications strategy

- Dr. Sami to present during next SMB meeting the evaluation of the IP. Relevant Tremonti reports are to be shared with the SMB at least two weeks in advance.
- The SMB members agreed to keep the job search going for an additive manufacturing lab engineer in addition to Tareq Farrah. Tareq Farrah will under training at EOS in Sept 2022.
- To leverage training for existing people to send them with Tareq Farrah as relevant.
- Dr. Wesley to check the status of Mariam's press release and update the SMB
- Dr. Steve to notify HR regarding Dr. Yahya's appointment as ARIC Deputy Director
- Dr. Wesley to invite Mariam to give a presentation outlining progress in order to see the continuity with Dr. Sanjeev's thermoplastics project.
- Dr. Yahya to present some of industrial solutions in the upcoming SMB
